

# Welcome to a new way to Pay

Apple Pay is the easy, secure, and private way to pay using your iPhone, iPad or Apple Watch. Here's a quick guide to get you started.

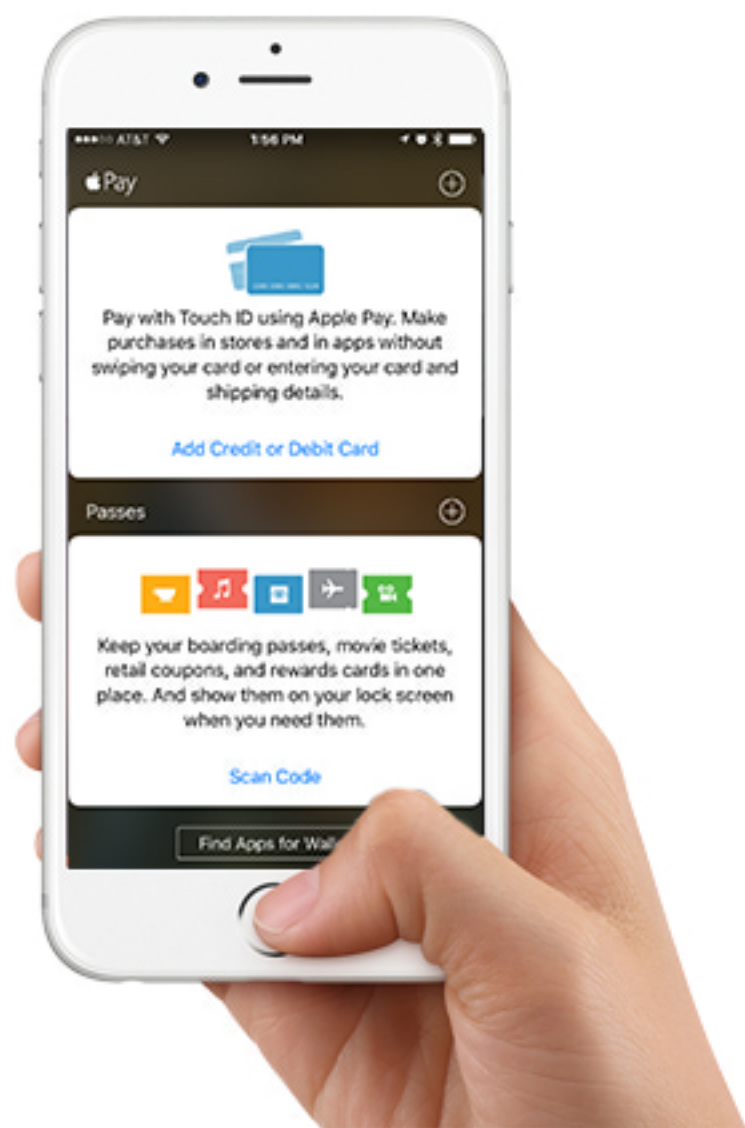

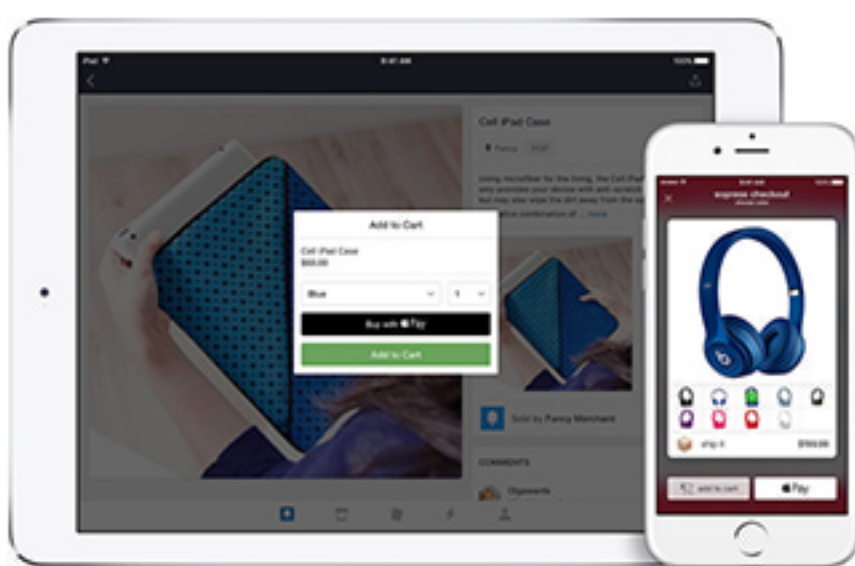

## Start paying in stores with iPhone and Apple Watch.

Apple Pay is accepted at over a million locations across the U.S., including Macy's Walgreen's, McDonald's, Whole Foods Market, Panera Bread and many local stores that support contactless payments. While checking out, simply hold your iPhone near the contactless reader with your finger on Touch ID- there's no need to open Wallet or even wake your display. Or you can double- click the Home button when iPhone is locked to access Wallet and pay. A subtle vibration and beep let you know your payment information was successfully sent. If you're using your Apple Watch to pay, just double-click the side button and hold the display up to the reader until you feel a gentle tap and hear a beep.

## Pay within apps with just a touch.

Now you can pay within popular apps like Airbnb, Etsy, and Uber without having to enter your card number and shipping information every time. When you're ready to purchase, tap the "Buy with Apple Pay" button, then place your finger on the Touch ID sensor on your iPhone and iPad.

## Setup is simple

Just head over to your pre-load Wallet app on your iPhone 6 or higher. Select add Credit or Debit Card and follow the steps from there. Once your card is activated you will be free to use the card immediately.

Apple Pay is one of the worlds most secure systems available on the market. Keeping your pin a secret by simply using your finger print.

Look for one of these symbols at checkout.
